Executive Summary

In its Twelfth Annual Report to the Public, the Healthcare Group Purchasing Industry Initiative (HGPII) has completed the following national survey of business practices within member group purchasing organizations (GPOs) that are signatories to its charter and principles. This report was compiled based on information gathered and confirmed by the HGPII Coordinators and their support team at Arent Fox LLP over the course of 2017 as part of a transparent process utilizing a standardized Public Accountability Questionnaire, follow up interviews with management in each participating organization, and select field visits conducted on-site annually on a rotating basis.

On the basis of this survey, the Initiative is able to conclude and certify the following:

1. Each of our member GPOs is fully compliant with the HGPII Charter and Principles as detailed below. Current HGPII members are listed on Appendix C. Each has participated fully in the HGPII Process, including the Annual Best Practices Seminar, public disclosure, and enforcement of their procedures, code of ethics and internal controls.

2. All HGPII members are maintaining and rigorously enforcing state of the art safeguards against conflicts of interest within their group purchasing programs.

3. Each member GPO is providing employees with ethics training while maintaining an internal system that encourages the timely reporting of ethical violations and violations of policy.

4. Every organization has in place contracting standards that meet the highest industry standard and offer providers, suppliers and healthcare consumers cost savings and flexibility. The length, terms and conditions of contracts are consistent with business best practices grounded in the demands of the healthcare marketplace.

5. The healthcare supply chain remains intensely competitive, and disciplines such as HGPII that promote best business practices are indispensable to the quality and affordability of services.

6. Each HGPII signatory has a vendor grievance process in place, supplemented by an arbitration procedure that is available through HGPII.
7. Every member group purchasing organization is implementing policies that encourage healthcare innovation and provide access to new products and technological breakthroughs.

8. Every organization adheres to industry standards in the use of administrative fees, and the blended average of charges remains substantially below the prescribed levels.

9. The industry has made a strong ongoing commitment to the promotion of a diverse supply chain, offering opportunities to minority-owned vendors to participate in contracts and access market opportunities. GPOs have partnered with providers to expand the effective use of healthcare spending to diversify the healthcare marketplace, and to achieve measurable results in the pursuit of social goals.

10. The HGPII membership is expanding its focus on providing environmentally sustainable contracts for healthcare products and services. Evolving standards, driven by community demand, are creating the opportunity to link healthcare spending to desirable public health outcomes. Individual GPOs are committed to offering sustainable products to healthcare providers on a cost-effective basis, and HGPII is participating in the industry debate.

11. HGPII conducted its annual Best Practices Forum in 2017, and continues to attract a broad cross-section of the national GPO supply chain leadership to this training and standard-setting event. This program is closely aligned with the disciplines of the HGPII process.

The following report is a comprehensive national survey of ethics and business practices within the GPO industry. It is intended to promote transparency in the healthcare supply chain and guarantee accountability within a sector charged with facilitating a balance between cost savings, quality and innovation in an industry experiencing an extraordinary scale of change.

The Role of the Group Purchasing Organization Sector in Containing Healthcare Spending

There has been considerable debate in Washington, D.C. over the last 12 months on the federal commitment to fund certain portions of the Affordable Care Act (ACA) and healthcare entitlement programs. Congressional leaders and Administrative officials considered legislative options to reduce federal spending on healthcare and contain the growth of such expenditures. The two issues have long been the subject of debate in Washington for good reason. The Centers
for Medicare and Medicaid Services (CMS) reported that spending on healthcare services in the U.S. totaled $3.3 trillion, or $10,348 per person, in 2016.\textsuperscript{1} During that same period, hospital expenditures grew 4.7 percent to $1,082.5 billion, which is slower than the 5.7 percent growth reported in 2015.\textsuperscript{2} Physician and clinical services expenditures grew to $664.9 billion in 2016, slower than the 5.9 percent growth rate in the previous year.\textsuperscript{3}

The GPO industry is a key component in helping to address this issue given their critical role as a cost containment measure to the organizations that enter into GPO agreements. Over 600 organizations in the U.S. participate in some form of group purchasing, including 97 percent of all not-for-profit, non-governmental hospitals.\textsuperscript{4} These health care organizations and providers rely on GPOs to negotiate contracts with vendors of medical products and related services. Roughly 72 percent of all purchases that a hospital makes is done through group purchasing contracts.\textsuperscript{5} Moreover, the use of standardized products helps to reduce medical errors thereby improving patient safety.

As discussions continue to evolve in Washington, D.C. on the alternative healthcare policies, the value and importance of GPOs in helping to reduce cost while also improve the quality of the services that are provided to patients should be acknowledged.

**Review of GPOs Adherence to Ethical Standards and Best Practices**

The GPO sector continues to have a central role in driving down healthcare costs for hospital and other healthcare facility purchases, while supporting the introduction of new products to the market. HGPII is committed to ensuring that its member organizations adhere to the highest ethical standards and engage in sound business practices that promote growth, transparency, opportunities for innovation, and the maintain the best value for their products and services. Our analysis confirms that HGPII members continue to excel at meeting these goals.

\textsuperscript{5} Ibid
GPOs adhere to the highest possible ethical standards and incorporate the best practices into their business models. Our evaluation of GPOs participating in HGPII has found the following:

1. **Business Structure and Conflicts of Interests:** GPO members continue to have a clear line of delineation in their ownership structures, including their parent or affiliated companies. A number have a Board of Directors or other governing body that includes an individual who represents the interests of GPO customers and employees. Rarely does a member of the Board also serve as employee, officer, or director of a participating vendor.

   Participating GPOs take constructive steps to reduce potential conflicts of interests with their employees, particularly in the case of those who serve in positions of influence. Each has robust written policies on conflicts of interest that clearly outline the practices that employees must adhere to and require their employees to review these policies on a regular basis. Employees who are in positions of influence are generally discouraged from owning equity in a participating vendor. In those instances where the employee does have equity in a participating vendor, they are required to disclose that relationship to the GPO. Some GPO’s require an employee to dispose of the equity conflict. Disclosure requirements generally apply to immediate family members of employees. Also employees are required to report any gifts they receive from participating vendors. Not all participating GPOs allow employees to receive such gifts. In those instances where gifts are permissible, there are clear limits on the value of the gift that an employee can receive.

2. **Other Lines of Business Outside of the GPO Practice:** Most of the GPOs participating in HGPII offer other business services to their members through a separate contract. Many of the services offered are complimentary to the GPO’s purchasing activities, such as consulting services related to supply chain management and analytic services generally are aimed at reducing operational inefficiencies. The GPOs that offer other lines of business use their conflict of interest policies to reduce potential improprieties in their business practice.

3. **Payment from Vendors:** The majority of GPOs accept sponsorship funds for educational programs and vendor fees related to participation in conferences and the use of exhibit space at annual membership meetings. Some GPOs report that, upon a members request, they provide additional information regarding vendor sponsorship, grant and exhibit fees.
4. **Contract Bid and Award Process:** Vendors interested in competing for a contract with a GPO can find a description of the bid and award process on the GPO’s website. Some GPOs use the Request for Proposals (RFP) process to review bids for some or all of its contracts. GPOs also, in some instances, make their contract schedule available to prospective vendors on their website. If a bidder is unsuccessful in getting an award for a contract, they generally are able to review the decision criteria used to evaluate the bid by requesting the information from the GPO.

5. **Use of Single, Sole, Dual and Multi-Source Contracts and Bundling of Unrelated Products and Services:** GPOs’ decisions related to the use of single, sole, dual, and multi-source contracts are primarily member-driven and are premised on the goal of achieving the best overall value and quality. A variety of procurement models are used, particularly dual- and multi-sourced contracts. Generally, single-sourced contracts occur when the GPOs membership determines that such an agreement is in their members’ best interest.

GPO practices vary on the bundling of unrelated products and services from the same vendor or different vendors. While a few organizations actively engage in bundling to receive the best value for their membership, most do not permit the use of bundling or will only do so if their members pursue it as a means of achieving the best value for products and services.

6. **Administrative Fees:** The majority of all GPOs participating in HGPII accept administrative fees up to, but not exceeding, 3%. In the limited instances where administrative fees exceed 3%, the fees are often associated with supplemental administrative services related to collecting outstanding fees and similar activities. For those GPOs that accept administrative fees beyond 3%, the fees are negotiated on an individual contract basis and are disclosed according to the federal Safe Harbor regulations.

7. **GPO Use of Private Label Programs:** Three GPOs participating in HGPII have private label programs that they offer to their members. Generally, private label programs are intended to provide additional supply at favorable prices for the GPO’s members, and in many cases the administrative fee structure for these programs parallel with that of other GPO portfolio offerings. A GPO that provides pharmacy products noted that it began offering private label
programs after it received member feedback over the changing marketplace for pharmaceutical products, including concerns with drug shortages.

8. **Vendor Grievance Process:** All GPOs continue to have a formal process for responding to vendor grievances regarding the bid and award process to ensure that vendors have a means to resolve legitimate disputes within the contract review process. In a few instances, the grievance process is directed by a GPO’s Compliance Officer. Over the course of the year in question, HGPII was contacted in one instance regarding the availability and use of its independent dispute arbitration mechanism: this case subsequently did not advance in the process. Additionally, all the participating GPOs engage in HGPII’s Independent Evaluation Process as an avenue for addressing grievances, and display the process on their public websites.

9. **Opportunities to Contract for Innovative Products and Services:** GPO have a formal process in place that allows them to readily evaluate and enter into contracts for innovative products and services throughout the calendar year. Many GPOs use standard GPO contracts that include a clause that allows them to enter into a new contract with a vendor to offer an innovative technology product at any time. Additionally, GPO members are permitted to evaluate products and communicate with a variety of vendors, regardless of whether the vendor has a contact with the GPO. There also are no restrictions on GPO members purchasing non-contracted innovative products or services directly from non-participating vendors.

On the basis of cumulative surveys of its member organizations, HGPII concludes that healthcare group purchasing activities by members of the Initiative have not created barriers to the timely introduction of innovation into the healthcare marketplace. Conversely, we have encountered consistent anecdotal evidence that breakthrough products vetted by healthcare GPOs are being brought to market and made nationally available more rapidly as the result of inclusion by GPOs. In some cases, small suppliers have been able to enhance their sales efforts by earning contracts with GPOs for their innovative products.
HGPII notes that its members have been successfully hosting innovation expos that contribute to the visibility and availability of new healthcare technologies. These activities have expanded substantially in recent years.

10. **Vendor Diversity Programs:** GPOs are making strides in their efforts to promote opportunities for small, minority, veteran, and women-owned vendors in the supply chain. Many engage in a broad array of educational initiatives and business strategies that are designed to create opportunities for vendors who are underrepresented in the industry. While some GPOs have contracts with a growing number of diverse suppliers and have engaged in efforts to develop relationships with them, others have collaborated with leaders in this area to take advantage of programs and networks established by other GPOs. While only a small number of GPOs have a dedicated Supplier Diversity Committee or a group that focuses exclusively on diversity issues, a majority are engaging in efforts that support this initiative.

11. **Code of Conduct:** GPOs work diligently to adhere to the highest ethical standards of conduct. HGPII members post a copy of their written code of business ethics and conduct on their public websites. Each organization ensures that all of its employees understand their own responsibilities and adhere to the Code of Conduct. Employees are required to take refresher courses on the material covered in the Code on an annual basis, although two GPOs require refresher courses to occur on a more frequent basis. Additionally, GPOs have a formal mechanism in place for employees to report possible violations of the Code of Conduct. Employees who witness or suspect violations are strongly encouraged to immediately speak with their supervisor or a senior official at the company.

12. **Reporting Potential Ethical Violations:** To protect the identity and ensure the confidentiality of employees who report possible violations of the Code of Conduct, some GPOs provide employees with a means of anonymously reporting the violation through a hotline, or a web-based reporting system, or by sending a secure email that gives the employee the option to maintain their anonymity. Violations are generally investigated by the Ethics & Compliance Officer and all HGPII members have safeguards in place to protect against retaliation. Many reported fostering an ethical culture where all employees are responsible to adhering to the
Code of Conduct. To ensure ongoing compliance, many conduct periodic training and education sessions with their senior managers.

**HGPII Initiative and its Mission**

Nine of the nation’s leading GPOs, serving the majority of America's hospitals, founded HGPII in 2005 to promote and monitor the best ethical and business practices in purchasing for hospitals and other healthcare providers. The goal of the organization is to assure ongoing adherence to ethical conduct and business practices, and to hold the confidence of the public and the government in the integrity of the industry.

The Initiative establishes six core principles of ethics and business conduct and tracks how participating companies implement those principles. Each participating company submits an Annual Public Accountability Questionnaire which addresses important areas of business practice and provides detailed written information on its policies and actions. These responses to the Public Accountability Questionnaire are posted on the [HGPII website](https://www.hgpii.org) and summarized in the Annual Public Accountability Report. The disclosure of policies and practices that GPOs believe assure adherence to the Initiative's six core principles permit policymakers and the public to assess for themselves the adequacy of these efforts. Following the release of each Annual Public Accountability Report, all HGPII members participate in an Annual Best Practices Forum to share information and to engage with policymakers and other leaders in the healthcare industry.

**Methodology**

This report is the result of a detailed Annual Public Accountability Questionnaire developed for HGPII members. The report has been continuously expanded and refined since the inception of HGPII in 2005. It represents a systematic survey of business practices and ethical standards within group purchasing organizations and is used to assess operational policies and compliance efforts within the healthcare supply chain. Following the completion of a written questionnaire, HGPII members participate in a conference call with the HGPII Coordinators who typically ask dozens of follow-up questions to clarify responses and provide greater detail regarding business practices. Two member companies are randomly selected each year for field visits conducted on site annually by the HGPII Coordinators. These visits provided
an opportunity to interact with company employees, review documents, and to make personal observations about the company’s commitment to adhering to the HGPII initiative.

In order to maximize the accuracy of this survey and its utility for analysts and policy makers, the HGPII team adopted the following process to accomplish this project:

1. Each HGPII member receives a detailed questionnaire that consists of dozens of questions requiring a comprehensive outline of the provider’s standards, business practices, employee activities, and enforcement of HGPII principles.

2. After all questionnaires are received, the HGPII Coordinator and policy team review the responses and match responses with referenced policies.

3. The questionnaire responses are posted on the HGPII “members only” section of the Initiative’s website for review by each responder and for peer review by other members of the Initiative.

4. Each HGPII member participates in, at minimum, a follow-up interview with its management team that is conducted by telephone to review and provide verification of elements of the questionnaires. In addition, to provide a deeper sampling, two member organizations are selected at random for field visits by the HGPII Coordinator with key personnel and management at their corporate headquarters.

5. Participating organizations may submit additional material to clarify and expand upon their questionnaire responses as the result of inquiries made at follow-up conferences.

6. To maximize transparency and public accountability, all responses to the questionnaires and a profile of each member are posted, as provided, for public viewing to HGPII’s website which can be found at: www.hgpii.com.

7. The content of the questions in the Questionnaires is reviewed annually as part of a mandatory Best Practices Forum. All HGPII members and signatory discuss key elements of the questionnaire and implications and improvements for the industry at large.
8. Each member of HGPII is given an opportunity to review a draft copy of the annual report in advance of its release to share any additional clarification or provide comments. HGPII members may not make changes to the report; that role is reserved for the independent HGPII Coordinators.

**HGPII members are committed to the following six principles, which are included in the charter of the organization:**

1) Each member shall have and adhere to a written Code of Conduct.

2) Each member shall train everyone within the organization on their personal responsibilities under the Code.

3) Each member commits itself to work toward the twin goals of high quality healthcare and cost effectiveness.

4) Each member commits itself to work toward an open and competitive purchasing process free of conflicts of interest and any undue influences.

5) Each member shall have the responsibility to one another to share their best practices in implementation the principles. Additionally, each member is required to participate in an Annual Best Practices Forum.

6) Each member, through participation in the Initiative, shall be accountable to the public.

Participating companies are expected to change their policies and practices as needed in order to answer each of the questions in the Annual Public Accountability Questionnaire in the affirmative and to provide adequate supporting documentation to permit the HGPII Coordinator to determine that each answer to the questionnaire is fairly given. It is expected that participation in the Initiative will be a key criterion for hospitals and other providers when they select membership in a GPO. The Steering Committee – the governing body of the Initiative that is comprised of the nine member GPO Chief Executive Officers – may suspend the participation of any GPO which fails to fulfill its obligations under the Initiative.

HGPII is comprised of the following group purchasing companies:

- Children’s Hospital Association (CHA)
- Acurity Inc., formerly known as GNYHA Services, Inc.
- HealthTrust Purchasing Group, L.P.
Administrative Fees and the GPO Safe Harbor

As noted above, healthcare group purchasing organizations utilize administrative fees paid by vendors to finance their operations. The federal “GPO Safe Harbor” regulatory exception to the Anti-Kickback statute permits GPOs to collect administrative fees, provided (i) the actual or maximum administrative fee percentage or amount is specified in a written agreement with the member provider and (ii) the administrative fee amounts received from each vendor are disclosed to the member provider annually in writing and upon request to the Secretary of U.S. Department of Health and Human Services (HHS).

HGPII has annually reviewed the industry-wide use of administrative fees in GPO contracts. Our team has tracked clear, but evolving, patterns in GPO administrative fees. Most contracts industry-wide provide for administrative fees at or below 3 percent, and a majority of GPOs conduct all of their group purchasing with administrative fees at or below 3 percent – indeed, with average administrative fees substantially below 3 percent overall. The HGPII survey, utilizing interviews that exceed the scope of individual responses to the annual questionnaire, has confirmed that on the whole the industry has maintained administrative fees of 3 percent or less and avoided abuses.

HGPII notes, however, that within the sector, innovation in response to competition has resulted in greater diversity between member business models, which is lending greater significance to the limited examples of administrative fees exceeding 3%. While GPOs continue to embrace transparency in the healthcare supply chain, including the disclosure of administrative fees, some organizations are offering contracts with fee structures linked to the particular member value attributed to the agreement, a significant development as GPOs
diversify the range of goods and services available under contract. Many of these developments are grounded in proprietary methods fundamental to their business model.

HGPII has determined that for a limited range of contracts that provide value-added products or services, healthcare GPOs will inevitably choose to compete with flexible but transparent administrative fees. In doing so, HGPII has concluded that current statutory and regulatory requirements are adequate to insure public disclosure and oversight.

**Group Purchasing and New Technologies**

One of the original priorities of the HGPII process is to embrace and promote purchasing standards that permit new medical technologies to be made available to GPO participants as they become available in the marketplace. The assessment and appropriate dissemination of new medical devices and healthcare products, with their timely availability to providers, is an important part of the function of GPOs. The HGPII team has long monitored the process by which our members review and negotiate contracts for breakthrough technologies.

We have confirmed that our member group purchasing organizations have established rigorous processes for evaluating new products. All of them engage providers to participate in this review. This evaluation system requires an important balance of objectives that permits technological advances to enter the marketplace free of unnecessary delay or cost. Ideally, GPOs can provide a useful service by sharing new products from vendors that lack the visibility or sales force to penetrate national markets. HGPII has identified small companies that have benefited from this opportunity.

HGPII notes that its signatories have maintained a commitment to new technologies, and recognize the need to invest time and resources dedicated to responding swiftly to the demand for state-of-the-art healthcare products. We have tracked increasingly sophisticated programs in most of the national GPO networks to mainstream novel products and accommodate innovation. Among the successes that we have identified:

- Health Trust conducts an annual Innovation Summit which is widely attended, providing suppliers with an avenue to introduce new technology products related to patient care,
information technology or supply chain management. The organization places a premium on developments that promote improved clinical outcomes and patient care.

- Vizient conducts an Innovation Technology Exchange in the fall which attracts a wide vendor participation and a growing provider audience. The company also maintains a web-based Innovation Technology Exchange, on which suppliers are able to post updated information about new products.

- Premier has managed its Technology Breakthrough Program since 1997.

Many of our smaller members participate in innovation programs with larger partners, and actively contribute to the recruitment of novel products.

**Vendor Diversity Survey**

Several GPOs have created programs aimed at promoting opportunities for small, minority, veteran, and women-owned vendors in the supply chain. In some instances, GPOs that have not created their own programs actively collaborate with others that have excelled in this area. Some examples of such GPO initiatives include:

- Acurity’s creation of the Buy Local program that supports area diverse suppliers in contracting with local hospitals by mentoring the vendor throughout the procurement process, connecting prospective vendors with hospitals, and assisting with contract development. Since the program launched in 2013, Acurity has worked with over 70 suppliers to educate them about the procurement process, the types of products and services that are of interest to hospitals, and how to meet the expectations of hospitals that enter into contracts with vendors.

- HealthTrust’s Supplier Diversity Program is a proactive program that identifies diverse suppliers who are able to compete for contracts. The program is managed by a dedicated team that interacts closely with HealthTrust’s contracting, implementation and clinical teams. It is primarily focused on building relationships with, and seeking opportunities for, minority-owned businesses, women-owned businesses, and veteran and service-disabled veteran-owned small businesses that are certified by the National Minority
Supplier Development Council, the Women’s Business Enterprise National Council, and/or the U.S. Department of Veteran Affairs.

- Intalere is one of the founding members of the Healthcare Supplier Diversity Alliance (HSDA), an informal network of healthcare organizations that work collaboratively to provide opportunities for diverse companies in the healthcare industry. HSDA builds and facilitates programs that raise awareness of supplier diversity in healthcare, provides diversity business enterprises with information and guidance on navigating the healthcare supply chain that will enhance the development of their organizations, and builds relations to help facilitate professional opportunities.

- Premier’s Sourcing Education and Enrichment for Diverse and Small Suppliers (SEEDS) provides the resources and tools to help minority-owned, women-owned, service-disabled veteran-owned, and small business vendors gain contract sales with its GPO members and build long-term business relationships. SEEDS includes coaching, mentoring, business educational tools and a stair-stepped approach to contracts which allows diverse suppliers to grow at a pace that is in line with their existing business infrastructure.

- In addition to Vizient’s broader supplier diversity program that works directly with small, women-owned, minority-owned, and veteran-owned businesses, Vizient’s Tier II program, launched in 2014, provides an opportunity for large contracted suppliers to report their spending with diverse suppliers and subcontractors. Tier II is an important initiative for Vizient’s members and allows the GPO to get a clearer understanding of the true economic impact of the supplier diversity program. The Tier II program also encourages large suppliers to partner with diverse suppliers upfront and pursue contracting opportunities as a team.

**HGPII Activities for the Reporting Year**

**Annual Best Practices Forum**

HGPII held its Twelfth Annual Best Practices Forum on July 26, 2017, in Washington, DC. The annual forum provides HGPII members an opportunity to participate in a day-long seminar with other members of the GPO community to review emerging issues facing the sector,
share best practices with their colleagues and reaffirm their commitment to adhering to high ethical standards.

This year’s forum included a number of panels that reviewed emerging issues facing the industry. Mr. Chris Jennings, the Founder and President of Jennings Policy Strategies, provided the keynote address that provided an outlook on federal healthcare policy in the midst of efforts to scale back the Affordable Care Act and cut spending in healthcare entitlement programs. Mr. Jennings also discussed how GPOs play an important role in helping to reduce healthcare spending in hospitals and other health facilities.

*Regulatory Panel*

Todd Ebert (President, Healthcare Supply Chain Association) discussed the important role that the Healthcare Supply Chain Association plays in serving as an advocate before federal policy makers for the GPO industry. Sonja Nesbit (HGPII) discussed some of the challenging regulatory issues that are facing the GPO sector, including the implications of potential changes in reimbursement rates in the healthcare system which could potentially lead to downward pressures in the healthcare supply chain.

The panel was moderated by Phil English, one of the HGPII Coordinators.

*HGPII Advisory Council Presentation and Discussion*

Two members of the HGPII Advisory Council – Jacqueline Brevard (Senior Advisor, GEC Risk Advisory) and William O’Rourke (Brigham Young University, John Carroll University Board Member) – led an interactive panel discussion on creating an environment that incentivizes the disclosure of serious ethics violations. After the panelists offered opening remarks, they presented a case study of a fictional company that experienced a whistleblower who publicly disclosed an ethics violation at the organization instead of reporting it to senior management. The audience, divided up into several groups, identified ways for an organization to avoid such a scenario by incorporating an incentive structure to support and actively encourage the disclosure of ethical violations to its senior management team.

The panel was moderated by Phil English, one of the HGPII Coordinators.
**Sustainability Panel**

Zoe Beck (Manager of Environmentally Preferred Products, Premier), Brent Gee (Assistant Vice President, Vizient), JoAnna Abrams (Founder and CEO, MindClick, Inc.), Sarah Chang (Worldwide Director of Sustainability, Johnson & Johnson), and Sarah L. Hill (Associate Director of Sustainability, Becton Dickenson) discussed how suppliers are moving towards environmentally friendly products. The panel also reviewed how suppliers can make GPOs and hospitals more aware of their sustainable offerings while helping them to continue to fulfill their mission of finding the best value for its membership.

The panel was moderated by Phil English, one of the HGPII Coordinators.

**Supplier Diversity Panel**

Deborah Williams (Senior Director of Sourcing & Supplier Diversity, Premier), Mark Cartwright (Assistant Director of Procurement, Vizient), and Joe Reubel (President, Kermal Medical Products, Inc.) discussed some of the obstacles faced by healthcare supply companies owned by people of color, women, veterans, and small business with finding opportunities in the healthcare supply chain. Mr. Reubel highlighted the challenges he faces in his efforts to identify business opportunities with large GPOs and reviewed measures that vendors and GPOs can take to better promote opportunities for greater inclusion in the supply chain.

The panel was moderated by Sonja Nesbit, the HGPII Executive Director.

**Steering Committee Panel**

Industry operatives representing some of the most innovative member organizations – the leaders of key healthcare group purchasing organizations – offered a lengthy overview of trends and challenges within the healthcare system that effect GPOs and how individual organizations are responding to changing conditions. The panel of leading executives (members of the HGPII Steering Committee) used their platform in the annual seminar to set new priorities and rededicate the participants to best practices.
The presentations explored vital current issues such as the diversification of GPO activities and new developments in healthcare transparency and compliance. The leaders projected major changes in the healthcare sector which would challenge the existing business models of GPOs, contributing to ongoing consolidation in the industry sector. Participating were:

- Edward Jones, President and CEO at HealthTrust
- Jennifer Gedney, Vice President, Supply Chain Services at Children's Hospital Association
- Jody Hatcher, President, Sourcing and Collaboration Services at Vizient
- Lee Perlman, President, GNYHA Ventures, Executive Vice President & CFO, Greater New York Hospital Association
- Mike Costabile, Chief Financial Officer at Intalere
- Durral Gilbert, President of Supply Chain Services at Premier
- Alan Sauber, Senior Healthcare Executive and Chief Ethics and Compliance Officer at Premier

The panel was moderated by Byron Dorgan, one of the HGPII Coordinators.

HGPII Initiative on Promoting Vendor Diversity in the Healthcare Supply Chain

HGPII members remain committed to creating greater opportunities in the healthcare supply chain for companies that are owned by women, people of color, veterans and members of the LGBT community. Following a panel discussions at the annual HGPII Seminar and the release of the 2017 report on the progress of initiatives that are aimed at increasing greater opportunities for the procurement of good and services from diverse vendors, the Initiative is working with its members to identify action items that it might consider adopting to further promote this important initiative.

Sustainability and Healthcare Spending

HGPII members are leading the movement in the use of safer and more environmentally responsible products in the healthcare industry. A number of organizations, who are seeing an
increased demand from their membership to support the use of sustainable products, are working collaboratively with healthcare suppliers and others in the industry, including Kaiser Permanente, to identify opportunities to enter into contracts that support the use of products that meet higher environmental standards, reduce water consumption and promote the use of renewable energy.

The Initiative has monitored the dramatic increase in sophisticated programming by healthcare GPOs to prioritize environmental sustainability as part of their contracting policies. This reflects a demand from members, and in many cases the communities they serve, to be able to employ their healthcare spending to promote health benefits that can result from environmental improvements. HGPII participants are building diverse programming to market environmentally beneficial products and services for the supply chain. This linkage of health services with sustainability has powerful appeal, and HGPII member organizations are all developing contracting programs that promise an improved impact on environmental issues. HGPII has concluded that sustainable purchasing is rapidly becoming associated with best business practices, and is moving to define and promote sustainability as an element of its standard setting mission.

Sustainability contracting has now matured into a national discipline with common practices and objectives available for ready application to the healthcare supply chain. However, challenges remain for GPOs committed to offering healthcare providers a broad menu of sustainable products and services. Our initial survey suggests that sustainability standards and priorities vary regionally, and some benefits remain difficult to quantify. Ultimately, group purchasing programs should be able to offer participants quantifiable benefits and competitive costs. The Initiative is reviewing sustainable contracting as best business practices emerge and the demand for environmentally-sensitive healthcare spending deepens. We anticipate that HGPII will increase the focus on sustainability in its best practices programming, include sustainability issues in its Annual Public Accountability Questionnaire process, and expand its outreach to those organizations on the cutting edge of developing sustainable choices from vendors.
In response to this demand, HGPII has explored new ways to support the supply chain industry in its growing emphasis on sustainability as a procurement objective. The annual Best Practices Forum now features a panel focused on the development of sustainability programs, and the Initiative is encouraging members to collaborate in environmental innovation. We anticipate an enhanced role for HPGIII in developing and monitoring best practices in promoting and measuring sustainability in the supply chain.

**HGPII Administrative Developments**

A. **Vendor Grievance Process**

   During this calendar year there was one instance of a vendor complaint filed with HGPII regarding a contract award decision by a member group purchasing organization. The HGPII team reviewed the compliant as part of its obligation under the organizational charter. Although the complaint ultimately failed as the result of a procedural deadline, the team had an opportunity to review and update the procedures, costs and fee structures supporting the arbitration process. A HGPII arbitration option is available to any vendor that files a complaint against a HGPII member regarding its contract process, and does not receive a resolution through the grievance process provided by the GPO as part of their HGPII obligation.

   The HGPII team confirms annually the compliance of all members with their obligation to offer all vendors access to a fair and structured grievance process that provides an opportunity for redress. HGPII also requires each member to make all vendors aware of the availability of a final arbitration opportunity for those who have exhausted their grievance opportunities at the GPO level.

B. **Website Redesign**

   The Initiative launched a new website that is designed to better serve the needs of HGPII members, the GPO industry and the general public. Our goal for the website has been to provide a platform for information to be distributed while also underscoring HGPII’s principal role in promoting best practices in the healthcare supply chain industry, by enforcing ethical standards and creating transparency based on a set group of core principles. As HGPII is a membership
organization that does not lobby policymakers, the website will serve as a vehicle to share information with policymakers and other interested parties.

C. **New Executive Director**

In July 2017, the Steering Committee agreed to name Sonja Nesbit as the Executive Director of HGPII. As the Executive Director, Ms. Nesbit is responsible for assisting the HGPII Coordinators and member organizations with the Initiative.

**Conclusion**

This year’s annual report, building on a decade of HGPII surveys and interviews, provides detailed evidence that the healthcare group purchasing industry has achieved a high degree of transparency and, more significantly, is consistently applying industry standards that permit the healthcare supply chain to function with a robust competition.

Although the GPO sector has experienced consolidation in recent years, the current acute care supply chain is mediated by a range of organizations with diverse specializations and business models. The broad acceptance of HGPII standards has contributed to a marketplace in which GPOs are able to promote high quality, achieve cost savings and sustain competitive purchasing in a predictable system. We have encountered evidence that this environment protects the purchasing choices of healthcare providers, and produces tangible benefits for vendors, health systems, and patients.

In a healthcare system under intense pressure to control costs, GPOs are able to leverage lower prices by reducing transaction costs, and by negotiating for members from a superior bargaining position. They have produced discounts throughout the supply chain, and have increased competition among suppliers. These objectives are only achievable through a common set of best practices, as HGPII has sought to promote.

We anticipate that the HGPII process and standards will continue to evolve with the supply chain reflecting changes in the healthcare system, and promote an ethical marketplace. The GPO sector will continue to play a significant role in the quest for affordable medical services.
APPENDIX A

CHARTER OF THE HEALTHCARE GROUP PURCHASING INDUSTRY INITIATIVE (HGPII)

The Healthcare Group Purchasing Industry Initiative (HGPII) was established in 2005 by the nation’s nine major healthcare group purchasing organizations (GPOs). These GPOs pledged to adopt and implement a set of principles for business ethics and conduct that acknowledges and expresses their responsibilities to the public as well as to government entities which fund healthcare services in the United States.

Healthcare GPOs are an essential link in the supply chain of healthcare providers such as hospitals, clinics, and other delivery organizations. GPOs aggregate the purchasing activity of their members, thereby lowering costs in both the purchasing activity itself and in the prices at which products and services are purchased. GPOs also enable members to coordinate the collection of data, facilitate an improvement of systems essential to the quality of care as well as an overall reduction of costs.

By joining HGPII, member organizations pledge to follow both a set of Core Principles established by the Initiative and to participate in an ongoing dialogue with other GPOs and various organizations, such as the Department of Health and Human Services, regarding the most effective policies and procedures for implementing these Principles.

The HGPII Principles are:

1) Each Signatory shall have and adhere to a written code of business conduct. The code establishes high ethical values and sound business practices for the Signatory’s group purchasing organization.

2) Each Signatory shall train all within the organization as to their personal responsibilities under the code.
3) Each Signatory commits itself to work toward the twin goals of high quality healthcare and cost effectiveness.

4) Each Signatory commits itself to work toward an open and competitive purchasing process free of conflicts of interest and any undue influences.

5) Each Signatory shall have the responsibility to each other to share their best practices in implementing the Principles; each Signatory shall participate in an annual Best Practices Forum.

6) Each Signatory, through its participation in this Initiative, shall be accountable to the public.

As they pursue these Principles, Signatories take a leading role in making the Principles a standard for the entire healthcare group purchasing industry, and a model for other healthcare industries.

**Annual Public Accountability Questionnaire**

On an annual basis, each Signatory organization files a report with the HGPII Coordinator that responds to the Annual Public Accountability Questionnaire (PAQ). These reports are available to the public, and are used by the HGPII Coordinator to compile a summary report on the adherence of Signatories to the Principles, as well as evolving Best Practices in fulfillment of the Principles. The PAQ captures information about each Member GPO’s business practices, codes of conduct, conflict of interest policies, fee structure, bid process, and many other in-depth issue areas.

**Organization**

HGPII consists of a Steering Committee, a Working Group, and an Initiative Coordinator that govern the Initiative.
The Steering Committee, which consist of the CEOs of all Signatory organizations, sets policies for HGPII, which are based on recommendations from the Working Group. (As the Initiative grows in size, the membership of the Steering Committee and Working Group may be limited to a representative group.)

The Working Group, which consist of one designee from each Signatory organization, is responsible for working with the HGPII Coordinator on ongoing initiatives, as well as other areas related to the management of the HGPII.

The HGPII Coordinator is the day-to-day operating officer of the organization and is responsible for planning and conducting meetings, including the annual Best Practices Forum, reviewing responses to the Annual Public Accountability Questionnaire, and preparing an annual report on the adherence of Signatories to the Principles and trends in Best Practices.

The Coordinator reviews the annual questionnaires for responsiveness, completeness, and accuracy, following up with participating organizations to recommend remedial action. The Coordinator also makes recommendations to the Working Group and the Steering Committee regarding the continued participation of organizations that do not take adequate remedial action.

Membership

Membership in HGPII is open to any healthcare GPO, including those entities in which group purchasing is only one of many activities of the organization. Upon joining HGPII, members must pledge to follow the Principles, to file the Public Accountability Questionnaire annually, and to participate in the annual Best Practice Forum.

HGPII does not anticipate refusing any good faith membership application or renewals, however, it does reserve the right to refuse or suspend membership privileges for cause.
APPENDIX B

HGPII CODE OF CONDUCT PRINCIPLES

Introduction:
The Healthcare Group Purchasing Industry Initiative ("Initiative") is an independent and voluntary organization created to establish and assure implementation of the highest ethical standards and business conduct practices in the healthcare group purchasing industry. Each Signatory of the Initiative pledges to follow a set of six core ethical and business principles, to report annually on adherence to these principles using an Annual Public Accountability Questionnaire, and to participate in an Annual Best Practices Forum to discuss best ethical and business conduct practices with other GPO representatives and interested parties. The six core principles underscore the healthcare group purchasing industry's commitment to use ethical business practices to help healthcare providers provide quality patient care at the most manageable cost.

The Initiative's six core principles are:

1. Each Signatory shall have and adhere to a written code of business conduct. The code establishes high ethical values and sound business practices for the Signatory's group purchasing organization.

2. Each Signatory shall train all within the organization as to their personal responsibilities under the code.

3. Each Signatory commits itself to work toward the twin goals of high quality healthcare and cost effectiveness.

4. Each Signatory commits itself to work toward an open and competitive purchasing process free of conflicts of interest and any undue influences.
5. Each Signatory shall have the responsibility to each other to share their best practices in implementing the Principles; each Signatory shall participate in an annual Best Practices Forum.

6. Each Signatory, through its participation in this Initiative, shall be accountable to the public.

Each Signatory is committed to the full implementation of the six core principles and shall not take any action that would be contrary to its intent and purpose. Each Signatory agrees to fully comply with the mandatory Healthcare Group Purchasing Code of Conduct Principles set forth below.

The Initiative also tracks how participating Signatories implement the Healthcare Group Purchasing Code of Conduct Principles through the Initiative's annual accountability process. Each Signatory submits an Annual Public Accountability Questionnaire to provide further transparency to the public regarding how each Signatory has implemented the Healthcare Group Purchasing Code of Conduct Principles. This disclosure allows government officials and the public to assess the adequacy of each organization's ethical and business practices.

**The Healthcare Group Purchasing Industry Initiative Code of Conduct Principles:**

1. Each GPO shall have and adhere to a written code of business conduct. The code establishes high ethical values expected for all within the Signatory's organization.
   a. Each GPO's distribution of code of business conduct ("Code") shall include:
      i. Distributing the Code to all new employees during their employee orientation; and
      ii. Making available the Code to all clinical advisory committee members, contractors, directors, agents and vendors.

   b. Each GPO's oversight of its Code shall include:
      i. A compliance officer to be responsible for overseeing compliance with the Code;
ii. A compliance committee or similar committee to advise the compliance officer and assist in the implementation of the Code;

iii. A mechanism whereby employees can report possible violations of the Code without fear of retribution;

iv. A mechanism to evaluate, investigate and resolve suspected violations of the Code;

v. A process to monitor on a continuing basis, adherence to the Code;

vi. A process whereby adherence to the Code is measured in job performance;

vii. A process to inform its Board of Director's committee or other appropriate committee regarding its adherence to its Code and its commitment to The Healthcare Group Purchasing Code of Conduct Principles; and

viii. A process to continually measure and improve upon the value of the GPO's Code by evaluating best practices within the healthcare group purchasing industry.

2. Each GPO shall train all within the organization as to their personal responsibilities under the code.
   a. Each GPO's Code training shall include:
      i. Providing all new employees training on the Code and any applicable law; and
      ii. Providing periodic compliance training, guidance and education on the Code and any applicable law to employees, committee members, directors, officers, and any applicable contracting agents.

3. Each GPO commits itself to work toward the twin goals of high quality healthcare and cost effectiveness.
   a. Each GPO's policies supporting high quality healthcare and cost effectiveness shall include:
      i. A policy that encourages a competitive marketplace for healthcare procurement;
      ii. A policy that encourages members to purchase future medical technology and products determined to be innovative.
iii. A policy that promotes the evaluation of innovative medical technology and products; and
iv. A policy that promotes purchase of safe medical products.

4. Each GPO commits itself to work toward an open and competitive purchasing process free of conflicts of interest and any undue influences.

a. Each GPO's conflict of interest policies related to individuals shall include:
   i. A requirement that employees in a position to influence the GPO contracting process not accept any gifts, entertainment, favors, honoraria, or personal service payments other than those of a Nominal Value from any participating vendor;
   ii. A policy prohibiting its employees who are in a position to influence the GPO contracting decisions from having an Individual Equity Interest in any participating vendor in the contract areas they influence;
   iii. A policy that requires that any employee not covered under Section 4(a)(ii), and any officer, director, or a member of an advisory board of a GPO who accepts any gifts, favors, honoraria or personal services payments other than those of Nominal Value from any participating vendor to disclose such transactions to the appropriate governing body and for that individual to be recused from any negotiations or decisions related to such participating vendor;
   iv. A policy that requires that any employee not covered under Section 4(a)(ii), officer, director, or a member of an advisory board of a GPO to disclose Individual Equity Interests in any participating vendor to the appropriate governing body and for that individual to be recused from any negotiations or decisions relating to such participating vendor; and
   v. A policy that requires all employees, directors, officers, and members of advisory boards to disclose information regarding any conflict of interest described in its Code on at least an annual basis.

b. Each GPO's conflict of interest policies shall include a policy to ensure that it does not have any Corporate Equity Interest in any participating vendor unless the acquisition of such Corporate Equity Interest demonstrably benefits the GPO's members, the GPO
discloses such equity interest to its members in writing, and the GPO imposes no obligation, commitment or other requirements or restrictions that in any way obligates a member to purchase goods or services from such participating vendor.

c. Each GPO's conflict of interest and disclosure policies related to administrative fees shall include:

   i. A policy that ensures the receipt of administrative fees from vendors do not encroach upon the best interests of the GPO's members;
   ii. A policy that requires it to have a written agreement with each member authorizing it to act as their purchasing agent to negotiate contracts with vendors to furnish goods or services to each member;
   iii. A policy to disclose in writing to each member or member's agent that it receives payments from participating vendors with respect to purchases made by or on behalf of such member;
   iv. A policy that requires it annually to disclose all administrative fees received from vendors for contracting activities with respect to purchases made by the respective member; and
   v. A policy that requires it annually to disclose all payments received from any vendor in the course of the GPO's group purchasing activities, but not allocable or otherwise reported with respect to the actual purchases of that or any other member.

d. Each GPO's policies to ensure an open and competitive purchasing process shall include:

   i. A requirement to publicly post on its website or through other appropriate means information about its contracting process and contract opportunities;
   ii. A policy to ensure a fair and unbiased system for evaluating healthcare products and services being considered for procurement;
   iii. A policy that allows its members to communicate directly with all vendors and evaluate their products, regardless of whether the vendor has a contract with the GPO;
iv. A policy that allows its members to purchase medical products from vendors that do not contract with the GPO;
v. A policy that establishes a vendor grievance procedure;
vi. A policy to ensure the appropriate use of bundling, length of contracts, and sole or dual source contracts; and
vii. A policy that promotes diversity among vendors to small, women and minority-owned vendors.

5. Each GPO shall have the responsibility to each other to share their best practices in implementing the Principles; each Signatory shall participate in an annual Best Practices Forum.
a. Each GPO's Best Practices Forum participation shall include sending an appropriate number of participants including senior executives to actively participate in the annual Best Practices Forum.

6. Each GPO shall be accountable to the public.
a. Each GPO's responsibilities shall include:
   i. Ensuring its CEO and Compliance Officer annual certify to the Initiative that it is in compliance with The Healthcare Group Purchasing Code of Conduct Principles;
   ii. Submitting its response to the Initiative's Annual Public Accountability Questionnaire on a timely basis; and
   iii. Ensuring its CEO and Compliance Officer annually certify to the Initiative that these individuals have reviewed and approved the GPO's Public Accountability response.

1. Nominal Value shall mean any item, service or other thing of value (not including cash or cash equivalents) that does not exceed $50 per instance or $100 in any given calendar year.

2. Individual Equity Interest is defined as securities, options, warrants, debt instruments (including loans), or rights to acquire any of the foregoing, provided, however that the term shall not include: (a) interests in publicly held mutual funds or (b) interests held in a blind trust in which all investment decisions are
independently managed by a third party and the existence and trust terms are fully disclosed to the appropriate governing body to ensure that neutrality of the GPO contracting decisions are protected.

3. Corporate Equity Interest shall mean securities, options, warrants, debt instruments (including loans), or rights to acquire the foregoing.

OWNERSHIP AND ORGANIZATIONAL STRUCTURE

1. Describe the ownership structure of your GPO and/or its parent or affiliated companies, including details regarding the following:
   - Person(s) or entities that control the majority of voting interests in your GPO;
   - The types of equity holders of your GPO (e.g., publicly-held company, healthcare providers, individuals, for-profit and/or not-for-profit entities);
   - The corporate form of your GPO and/or its parent or affiliated companies – such as corporation, partnership, limited liability company, co-op;
   - Whether the GPO is organized as a for-profit or not-for-profit organization; and
   - Location of corporate headquarters.

2. Describe the composition of your Board of Directors or other governing body and reflect any changes from the previous HGPII reporting year. Include the following in your response:
   - Number of individuals serving on your Board;
   - Percentage of Board representing GPO customers;
   - Percentage of Board that are employees of the GPO; and
   - Percentage of Board members also serving as employees, officers, or directors of a participating vendor.

3. Indicate whether any equity holder of your GPO and/or its parent or affiliated companies is a physician (or an immediate family member of a physician).

CONFLICT OF INTEREST

4. Describe the GPO’s policies and procedures that address conflicts of interest for:
Employees in a position of influence with regard to contracting decisions;
Clinical Advisory Members; and
Members of the GPO’s Board of Directors or other governing body.

As part of your response, provide details about reporting requirements for conflicts and provide a copy of written policies.

5. Describe actions the GPO takes to avoid conflict of interest issues for members of the Board of Directors (e.g. disclosure and/or prevention of equity investments in participating vendor relationships and acceptance of gifts/meals/travel/entertainment paid for by vendors.)

6. Describe the GPO’s policies and procedures that address activities, including other lines of business of the GPO and/or its affiliates (including non GPO services and strategic investments) that might constitute conflicts of interest to the independence of its purchasing activity. [6]

OTHER LINES OF BUSINESS

7. Describe other lines of business or investments of the GPO and its affiliates. We are interested in hearing about new as well as nontraditional GPO services that your company and its affiliates are involved with.

8. What policies or guidelines does the GPO have to address potential conflicts of interest with regard to other lines of business engaged in by the GPO and/or its parent or affiliated companies?

MONIES FROM VENDORS

9. Describe the GPO’s policy with respect to the receipt of sponsorship funds, grants for research or other educational programs, or any other source of non-administrative fee revenue from vendors. What policies does the GPO have to guard against any potential conflict of interest relating to such payments?

10. Does the GPO and/or its parent of affiliated companies accept vendor fees relating to conference sponsorship or exhibit booth space? What policies does the GPO have to guard against a potential conflict of interest relating to vendor participation in industry trade shows, and donations in general?

11. Describe any services or products the GPO or its affiliates provide to vendors on a fee-for-service basis (e.g. data, claims processing, etc.).

---

[6] Business concerns, organizations, or individuals are affiliates of each other if, directly or indirectly, (1) either one controls or has the power to control the other, or (2) a third party controls or has the power to control both. (See 48 CFR, Section 9.403 (2007): Securities Act, Sec. 16, 15 USC 77p(f)).
12. Does the GPO make annual disclosures of administrative fees received from vendors for contracting activities with respect to the member’s purchase of products and services (e.g. safe harbor reports)? If this document is publicly available, provide an electronic link to this information.

13. Does the GPO disclose to members all payments other than administrative fees the GPO receives from any vendor in the course of the GPO’s group purchasing activities (e.g. booth space, educational grants, marketing fees, honoraria, etc.) whether from the purchasing activity of those members or not? Describe your disclosure practices.

14. Describe the GPO’s policy with respect to returning administrative fees to an ineligible vendor.

**MEMBER FEES**

15. Does the GPO pay fees or offer equity to members upon the signing or re-signing of a participation agreement with the GPO or the joining or renewal of membership in the GPO program?

**BID AND AWARD/CONTRACTING ISSUES**

16. Does the GPO have a publicly-available description of its bid and award process? If so, provide a link and written description of your bid and award process. If not, describe how it may be obtained.

17. Describe the GPO’s requirements for how products or services are published so they are accessible to potential vendors. If a bidder is not awarded a contract, is that bidder able to review the decision criteria used to evaluate the bid? Include in your response a general description of the GPO’s criteria for vendor selection.

18. Describe the GPO’s policy with regard to the use of single, sole, dual, and multi-source procurement and provide an example or two to support use of these contracting tools.

19. Does the GPO permit bundling of unrelated products or services from the same vendor or from different vendors? If so, under what circumstances would the GPO consider bundling to be appropriate?

20. Describe the process for contracting for clinical preference items. Describe the GPO’s policy guiding the appropriate length/term of contracts for clinical preference products.

**ADMINISTRATIVE FEES**

21. What is the GPO’s practice regarding the amount of administrative fees accepted? If there is a written policy, please provide an electronic link or copy of the GPO’s policy regarding these fees.
22. Describe the conditions in which the GPO accepts administrative fees beyond 3 percent, requiring specific (not blanket) disclosure under the Federal Regulatory Safe Harbor provisions.

23. Describe the range of administrative fees accepted and examples of the types of contracts (without specifying specific proprietary information) that have administrative fees greater than 3 percent.

PRIVATE LABEL PROGRAMS

24. Describe whether the GPO has a private label program and if so, describe the products the private label program covers.

25. Describe the GPO’s practice regarding administrative fees derived from a private label program.

VENDOR GRIEVANCE PROCESS

26. Describe the GPO’s policy and process with respect to responding to a vendor’s grievance regarding the bid/award process.

27. Did any supplier, since submission of the last GPO’s Public Accountability Questionnaire, request an evaluation pursuant to the HGPII Independent Evaluation Process? If so, please provide information regarding the outcome of such evaluation.

28. Does the GPO participate in HGPII’s Independent Evaluation Process?

29. Is the HGPII Independent Evaluation Process displayed on the GPO’s public website? If so, please provide an electronic link to this information.

INNOVATION

30. Describe the GPO’s policy and process to evaluate and provide opportunities to contract for innovative products and services.

31. Does the GPO have the right to enter into a GPO contract for innovative technology at any time during its bid and award cycle? Describe the process the GPO has for fostering the development of GPO contracts for innovative products.

32. Are GPO members allowed to evaluate products and/or communicate with vendors, regardless of whether a vendor has a contract with the GPO?

33. Are GPO members allowed to purchase non-contracted products or services directly from non-participating vendors?
VENDOR DIVERSITY PROGRAMS

34. Describe the GPO’s program or activities that encourage contracting with Diverse Suppliers (small, women-owned, veteran owned, minority-owned). Explain how you promote or market those programs to the GPO’s membership and to Diverse Suppliers.

35. Has the GPO increased contracting with Diverse Suppliers over the prior year(s)? If so, quantify these increases within each Diverse Supplier category (SBE, WBE, VBE, and/or MBE).

36. Does the GPO have a Supplier Diversity Committee or other program or group for developing diversity goals and expanding opportunities? If so, describe. What are its mission, goals, and objectives? Does it work directly with the GPO’s sourcing team in developing its goals and expanding opportunities? What are the Committee’s significant achievements over the GPO’s last fiscal year? If it is a committee, who are its members and how frequently does it meet?

37. Does the program described in question 36 provide education to member health systems regarding diversity program best practices and/or how to establish a Supplier Diversity Program within their system? Does it solicit member feedback to ensure it is meeting member expectations?

38. Describe any other actions concerning Supplier Diversity you think are important that are not covered by the preceding questions.

CODE OF CONDUCT

39. Provide a copy of (as well as an electronic link to) your GPO’s written code of business ethics and conduct and describe any changes from the previous HGPII reporting year.

40. Describe whether and in what manner the GPO distributes its written code of business ethics and conduct to all applicable employees, agents, contractors, clinical advisory committees, and others involved in group purchasing activity. How often is the code of conduct provided to employees? Do employees receive annual refresher training on the GPO’s ethics and the code of conduct? Describe the content of the training and the method of delivery.

41. Describe the mechanism (e.g., a corporate review board, ombudsman, corporate compliance or ethics officer) for employees to report possible violations of the written code of business ethics and conduct to someone other than one’s direct supervisor, if necessary.
REPORTING POTENTIAL ETHICAL VIOLATIONS

42. What process is used to protect the confidentiality of the reporting employee’s identity and what safeguards are in place to mitigate the opportunities for retaliation?

43. Describe how the GPO follows up on reports of suspected violations of the code of business ethics and conduct to determine if a violation has occurred and if so, who was responsible. Describe corrective and other actions taken in such circumstances.

44. Describe the processes the GPO follows up on, to monitor on a continuing basis, adherence to the written code of business ethics and conduct, and compliance with applicable federal laws.

45. Are periodic reports on the GPO’s ethics and compliance program made to the GPO’s Board of Directors or to a committee of the Board? If so, please state how often and in general, what information is reported? Are periodic reports on the company’s participation in HGPII made to the GPOs Board of Directors or to a committee of the Board? If so, please state how often and in general, what information is reported.

46. How many of your GPO employees attended the Best Practices Forum in 2014? Include the name of the most senior executive who attended.

47. List the name, title and contact information of the senior manager assigned responsibility to oversee the business ethics and conduct program. Provide the name, title and contact information for the individual(s) responsible for responding to this report.
AGENDA HPGII ANNUAL BEST PRACTICES FORUM
July 26, 2017

*All of the conference sessions will be held in the Multipurpose Room

8:00AM-9:00AM  Breakfast and Networking Session

9:00AM-9:30AM  Welcome and Opening Remarks
  • Jody Hatcher, Chairman, HPGII Steering Committee
  • Phil English, HPGII Coordinator
  • Byron Dorgan, HPGII Co-Coordinator

9:30AM-10:15AM  Keynote Speaker
  • Introduction by Byron Dorgan, HPGII Co-Coordinator
  • Chris Jennings, Founder and President at Jennings Policy Strategies, Inc.

10:15AM-10:30PM  Morning Break

10:30AM-11:15AM  Regulatory Panel: What are the Most Challenging Regulatory Issues Facing GPOs Today?
  **Moderator:** Phil English
  **Panelists:**
  • Todd Ebert, President and CEO, Healthcare Supply Chain Association (HSCA)
  • Sonja Nesbit, Sr. Government Relations Director, HPGII
11:15AM-12:00PM  HGPII Advisory Council Presentation: *Incentivizing the Disclosure of Sensitive Information within your Organization*

**Moderator:** Phil English, HGPII Coordinator

**Panelist:**
- Jacqueline Brevard, Senior Advisor, GEC Risk Advisory LLC
- William O’Rourke, Executive Director, The Beard Institute, Duquesne

12:00PM-1:00PM  Lunch

1:00PM-1:45PM  Sustainability Panel: *A Culture of Sustainability in Healthcare, Part II*

**Moderator:** Phil English, HGPII Coordinator

**Panelist:**
- Zoe Beck, Manager, Environmentally Preferred Products Supply Chain Services, Premier, Inc.
- Brent Gee, Associate Vice President of Strategic Programs, Vizient, Inc.
- JoAnna Abrams, Founder & CEO, MindClick, Inc.
- Sarah Chang, WW Director, Sustainability, Johnson & Johnson
- Sarah Hill, Senior Manager, Global Sustainability, Becton Dickenson (BD)

1:45PM-2:30PM  Supplier Diversity Discussion: *Supplier Diversity within Group Purchasing Organizations*

**Moderator:** Sonja Nesbit

**Panelist:**
- Deborah Williams, Senior Director of Sourcing and Supplier Diversity, Premier, Inc.
- Mark Cartwright, Senior Director of Supplier Diversity, Vizient, Inc.
• Joe Reubel, President, Kermal Medical Products, Inc.

2:30PM-2:45PM  Afternoon Break

2:45PM-3:30PM  Steering Committee Panel
Moderator: Byron Dorgan, HGPII Co-Cordinator
GPO Executives will discuss matters that are of great interest to HGPII and respond to questions from attendees

3:30PM-3:40PM  Closing Remarks
  • Phil English, HGPII Coordinator

3:40PM-5:30PM  Closing Reception in the Arent Fox Cafe
Please join us in the Arent Fox Café on the second floor

APPENDIX I

HGPII INDEPENDENT EVALUATION

PURPOSE

HGPII, as well as the individual member GPOs, actively promote the use of competitive contracting processes to maximize value and quality to GPO members insuring all vendors are treated in a fair and unbiased manner. (The contracting processes utilized by each individual GPO to competitively solicit proposals from and award contracts to vendors or to evaluate new technology submissions from and award new technology contracts to vendors is referred to as the "GPO Contract Process"). In an effort to provide vendors with a forum to voice complaints regarding award decisions, each GPO, as a condition of its membership in HGPII, has agreed to participate in a two-step review process. The first step is a formal, published process established by each GPO to review vendor concerns (the "GPO Grievance Process").

Although individual GPO Grievance Processes vary, each is designed to provide vendors with an understanding of the bid process, foster respect for member decision making, and provide an opportunity for vendors to raise discrepancies that might have occurred during the process. In the vast majority of instances, this process will be sufficient to address a vendor's concerns. Where a vendor continues to have concerns they may request an independent and unbiased third party evaluation through the HGPII Independent Evaluation (HGPII Evaluation).

It is important to note the HGPII Evaluation is not intended to resolve contractual disputes or review clinical evaluations or other decisions that are the purview of a GPO Member Council. Because GPO Members are both the final decision makers and the ultimate purchasers of product, actions taken pursuant to a HGPII Evaluation outcome may be subject to review and final approval by a Member Council. (Vendors should review each GPO Vendor Grievance Process and/or code of conduct for information regarding Member Council review.)
INDEPENDENCY OF HGPII EVALUATION

In order to facilitate the HGPII Evaluation and insure independency, HGPII utilizes the services of the American Arbitration Association® (AAA), an organization that provides alternative dispute resolution services. A Neutral is chosen by AAA from a list of neutral experts maintained by AAA. The Neutral evaluates the issues in dispute and provides an unbiased opinion. By following the process outlined herein and utilizing neutral experts vetted and selected by AAA, the vendor is assured a fully independent review.

SCOPE OF HGPII EVALUATION

The role of the Neutral is to review vendor complaints and provide an evaluation as to whether the Vendor failed to receive an award as a result of a failure of the GPO to follow principles of the applicable GPO Contract Process. The Neutral may make recommendations regarding a GPO Contract Process, applying a reasonable business standard. The Neutral will not review business decisions or decisions that are the purview of a Member Council, such as clinical evaluations or scoring. Further, the Neutral shall have no authority to provide an evaluation regarding the legality of a GPO Contract Process or GPO Grievance Process.

The HGPII Evaluation is available for vendor complaints associated with awards for GPO national contracts. Bids or new technology submissions conducted and/or reviewed by a GPO at the request of and exclusively for an individual hospital or a distinct group of identifiable hospitals are conducted pursuant to criteria and processes that are established and overseen by such hospital or group. Accordingly, such processes and awards are not subject to review through the HGPII Evaluation.

All HGPII member GPOs have agreed to participate in the HGPII Evaluation. HGPII will facilitate requests for HGPII Evaluation brought against a non-HGPII member provided such GPO has also agreed to participate.
TYPES OF VENDOR COMPLAINTS ELIGIBLE FOR REVIEW

*Pre-award* – Occurs when a Vendor has been informed prior to a contract award announcement that it will not receive an award relative to a competitively-bid RFP (e.g., the vendor failed to meet minimum bid requirements).

*Post-award* – Occurs when a Vendor is informed concurrently with or after the award announcement that it will not receive an award.

*New Technology* – Occurs when a Vendor is denied a contract award following submission of a request for a contract award for New Technology.

PROCESS FOR HGPII EVALUATION

1. Prior to initiating a HGPII Evaluation, the Vendor must first submit its complaint to and complete the GPO's formal, published grievance process ("GPO Grievance Process").

2. Within five business days following receipt of the decision rendered by the GPO as a result of the GPO Grievance Process, the Vendor shall send to AAA (with a copy each to the HGPII Coordinator and to the applicable GPO's ethics and compliance officer) the following information:
   - The Vendor's executed agreement relative to HGPII Evaluation in the form attached;
   - The names, addresses and telephone numbers of the parties and their representatives;
   - A copy of the decision rendered by the GPO at the conclusion of its formal grievance process;
   - An executed Confidentiality Agreement
   - The case setup fees as set out below.

3. The HGPII Evaluation will be conducted pursuant to the rules of the HGPII Evaluation process and the AAA's Early Neutral Evaluation Procedures.

4. AAA will facilitate communication among the parties, insure that AAA is in possession of all necessary documentation, and provide other assistance as necessary to facilitate the prompt
conclusion of the HGPII Evaluation.

5. AAA will select a single Neutral, and will provide biographical information on the proposed Neutral to the parties.

No person shall serve as a Neutral in any dispute in which that person has any financial or personal interest in the result of the HGPII Evaluation, except by the written consent of all parties. Prior to accepting an appointment, the prospective Neutral shall disclose any circumstance likely to create a presumption of bias or prevent a prompt meeting with the parties. Upon receipt of such information, AAA shall either replace the Neutral or immediately communicate the information to the parties for their comments. In the event that a party objects to the Neutral or the appointed Neutral is unable to serve promptly, AAA will appoint another Neutral.

The Neutral will work with the parties in setting forth an appropriate schedule for exchanging initial written statements and submitting those to the Neutral. The initial statement shall describe the substance of the complaint, the parties' view of the issues, key evidence and any other information that may be useful to the Neutral. The GPO shall also provide to the Neutral any assertions of Disqualifying Factors, as set out below. The Neutral and the parties will decide on the length and extent of the initial written statements. Each party shall provide copies of its initial written statement and Disqualifying Factors, if any, to the other party. The parties may mutually agree to have the Neutral make a determination based on their written submission.

6. Prior to the start of an Evaluation Session the Neutral shall review the assertions of Disqualifying Factors and may, based on the written submissions, make a determination that a Disqualifying Factor exists, in which event no further review by the Neutral will take place. The Vendor may, at its discretion, submit to the Neutral its written response in opposition to the GPO's assertion of Disqualifying Factors, which shall be taken into consideration by the Neutral in making a determination. The Neutral may, at his/her discretion, refrain from making an initial determination of Disqualifying Factors, but continue to take the GPO's assertion of Disqualifying Factors into consideration throughout the process. If at any time during the
process the Neutral determines that a Disqualifying Factor exists, the Neutral shall advise the parties of such determination, at which point the HGPII Evaluation shall be deemed concluded. Notwithstanding a determination of a Disqualifying Factor, the Neutral may, in his/her sole discretion, make recommendations, utilizing a reasonable business standard, regarding the GPO Contract Process or GPO Grievance Process.

7. An in person Evaluation Session with the Neutral is preferred; however, the parties may meet with the Neutral by teleconference or videoconference upon the mutual agreement of the parties. The Neutral shall facilitate communication amongst the parties to identify a convenient location for the in person Evaluation Session or teleconference or videoconference. Such Evaluation Session shall be scheduled at an agreed upon time and place, each party to bear its own travel and other costs. At such meeting, teleconference, or videoconference, each party will verbally and through documents or other media present its claims or defenses and describe the principal evidence on which they are based. The Evaluation Session is informal and the rules of evidence do not apply. Each party shall have in attendance throughout the Evaluation Session a representative with settlement authority. There is no formal examination or cross-examination of witnesses and the presentations and discussions will not be recorded.

8. Unless the parties and Neutral agree to another timeline, a written evaluation will be rendered within five business days after the conclusion of the proceedings and no later than 60 calendar days following AAA's receipt of the request for a HGPII Evaluation. The Neutral may also present his/her HGPII Evaluation verbally upon the consent of both the request of any party. After the receipt of the HGPII Evaluation, the parties can make further inquiry about issues and points made in the evaluation.

TIMELINES
The timelines established within the HGPII Evaluation process are designed to insure a prompt and expedient resolution of the complaint.
CONFIDENTIALITY OF HGPII EVALUATION

Neither the Neutral, the Coordinator, nor any party hereto shall divulge confidential information disclosed to them by the parties or by witnesses in the course of the HGPII Evaluation. All records, reports or other documents received by the Neutral while serving in that capacity shall be confidential.

Neither the Neutral nor the Coordinator shall be compelled to divulge such records or to testify in regard to the HGPII Evaluation in any adversary proceeding or judicial forum. Notwithstanding the above, the Neutral and the Coordinator may make available information related to a HGPII Evaluation, including a copy of the Neutral's evaluation, pursuant to the request or inquiry of a duly authorized governmental body, provided that prior notice is provided to each party whose documents/information is being requested along with a copy of the specific materials that are to be disclosed, and provided further that confidentiality is requested for the materials being disclosed.

The parties shall maintain the confidentiality of the HGPII Evaluation and shall not rely on or introduce as evidence in any arbitral, judicial or other proceeding:

• Views expressed or suggestions made by another party with respect to a possible settlement of the dispute which takes place during the HGPII Evaluation;
• Admissions made by another party in the course of the HGPII Evaluation proceedings;
• Proposals made or views expressed by the Neutral; or
• The fact that another party had or had not indicated willingness to accept a proposal for settlement made by the Neutral.

APPLICATIONS TO COURT AND LIMITATION OF LIABILITY

Neither HGPII, AAA, nor any Neutral is a necessary party in judicial proceedings relating to the subject of the Evaluation.

Neither HGPII, AAA, nor any Neutral shall be liable to any party for any act or omission in connection with any HGPII Evaluation.
DISQUALIFYING FACTORS OF A HGPII EVALUATION

The following Disqualifying Factors shall be taken into consideration by the Neutral, as set out herein:

• Complaints that are general in nature and do not state a specific failure to adhere to the GPO Contract Process.
• An allegation that the GPO Contract Process or award decision is in violation of law, is inadequate or otherwise inappropriate. Allegations of this nature should be brought to the attention of the Coordinator.
• A failure by the Vendor to submit a response to a RFP (or other required documentation) by the deadline specified in the RFP instructions, or other failures to satisfy procedural or minimum requirements, including but not limited to a failure of the parties to reach mutually agreeable contract terms.
• Failure of a Vendor to meet established time lines for filing a request for HGPII Evaluation (as set forth above).
• Any complaint related to a request for a New Technology award where Vendor failed to respond to a previous RFP for that product which met the description of the Vendor's product and the Vendor's product was being marketed by the Vendor at the time of the RFP.
• The Vendor has failed to cooperate with the Neutral during the HGPII Evaluation, including without limitation the failure to provide requested information in a timely manner.
• The Vendor failed to complete the GPO Grievance Process.
• Any complaint relative to a RFP and/or award that already has been the subject of a HGPII Evaluation in relation to the same Vendor.
• Complaints related to award decisions or other actions associated with the RFP that are the subject of litigation. If, during the course of the HGPII Evaluation process, either party files suit against the other, then the HGPII Evaluation shall immediately cease and all submitted materials will be immediately returned to the submitting party.
OUTCOMES
The HGPII Evaluation is designed to provide a Vendor with an independent evaluation of its complaint. The evaluation shall reflect the Neutral's opinion regarding the Vendor's response to the RFP and the GPO's review and evaluation of such response in relation to the underlying RFP, the GPO Contract Process, and the GPO Grievance Process. The Neutral will not, however, provide any opinion relative to decisions reached by a Member or Member Council in connection with the applicable RFP. In addition, the Neutral may, in his/her discretion, provide recommendations regarding the GPO Contract Process and/or the GPO Grievance Process.

In the event the Neutral issues an opinion that (i) the GPO Contract Process was not followed AND (ii) as a result of not following the GPO Contract Process the Vendor was denied a contract award, then the GPO shall, subject to the individual GPO Contract Process, either (x) award a contract to the Vendor, (y) bid or re-bid the product or product category, (z) or submit the HGPII Evaluation to the appropriate GPO Member Council for reevaluation of the award decision, taking into account the HGPII Evaluation. Within five business days following receipt of the Neutral's evaluation, the GPO shall notify the Vendor and the Coordinator of whether the GPO is awarding a contract, bidding or re-bidding the product or product category, or submitting the HGPII Evaluation to the appropriate GPO Member Council. In the event the GPO submits the HGPII Evaluation opinion to its Member Council, the GPO shall make all reasonable efforts to facilitate a prompt meeting and decision of such Member Council. Notification of the Member Council decision shall be provided to the Vendor and Coordinator within five business days of the Member Council reaching a decision.

In the event the Coordinator, upon receipt of the Neutral's evaluation, believes that a HGPII GPO member has failed in a material and serious degree to observe the HGPII Principles, or has engaged in conduct materially and seriously prejudicial to the interest of HGPII, the Coordinator shall review and discuss such complaints with the GPO and shall take such action as the Coordinator deems necessary and prudent pursuant to the By-Laws of the HGPII.

No party shall have any obligation to amend or otherwise change policies or practices in response to recommendations made by the Neutral. However, parties are encouraged to consider
such recommendations in the context of industry best practices, reasonable business practices, and GPO member needs and input.

Retaliation against any Vendor who, in good faith, requests review pursuant to a GPO Grievance Process or the HGPII Evaluation is prohibited. Concerns regarding retaliation should be brought to the attention of the Coordinator. (Contact information is set out below.)

FEES AND EXPENSES
A non-refundable case set-up fee per party is charged by AAA. In addition, a non-refundable case set-up fee per party is charged by HGPII. In addition to the case set-up fees, the Neutral shall charge, at his or her published rate, for conference, review and study time, as well as for expenses. The Neutral may assess all charges to one party or divide the obligation for the Neutral's charges between the parties based on the Neutral's evaluation of culpability. Each party is responsible for its own costs, including legal fees, incurred in connection with the HGPII Evaluation.

Before the commencement of the HGPII Evaluation, AAA shall estimate anticipated total cost and each party shall be required to pay its portion of the case set-up fees and an amount equal to the Neutral's estimated charges prior to the HGPII Evaluation. When the HGPII Evaluation is concluded, AAA shall render an accounting in accordance with the assessment of fees as determined by the Neutral and shall return any unexpended balance to the applicable party. In the event a party is determined to owe more in fees than has previously been paid to AAA, such party shall pay the difference to AAA within 5 business days of receipt of notification of fees due.

ANNUAL REPORT OF HGPII EVALUATION
The Coordinator shall set out in HGPII's annual report a summary report including the number of HGPII Evaluation requests received, the number of evaluations conducted and the number of requests which were denied as a result of disqualifying factors. The Coordinator may, in his/her discretion provide general information regarding types of complaints, however, any such
information shall be blinded as to the names of the parties and as to any information that might otherwise identify any party to a HGPII Evaluation.

Each HGPII GPO shall provide information regarding its GPO Grievance Process, as well as information regarding its participation in and outcomes of any HGPII Evaluations in its responses to the HGPII Annual Public Accountability Questionnaire.

**NOTICES**

All notices and other communications to any party hereunder shall be in writing and shall be given to such party at its address set forth on the signature page hereof. Each such notice or other communication shall be effective if given (i) by mail, 48 hours after such communication is deposited in the mail with first class postage prepaid, (ii) by nationally recognized overnight courier, 24 hours after sending, or (iii) by any other means when delivered.

**DEFINITIONS:**

"AAA" means the American Arbitration Association.

"Coordinator" means the Initiative Coordinator of HGPII.

"GPO" means a healthcare group purchasing organization.

"GPO Contract Process" means the contracting process utilized by an individual GPO (i) to competitively solicit proposals from and award contracts to Vendors or (ii) to evaluate New Technology submissions from and award New Technology contracts to Vendors.

"GPO Grievance Process" means the published process established by a GPO to review a Vendor complaint.

"HGPII" means the Healthcare Group Purchasing Industry Initiative.

"HGPII Evaluation" means the HGPII Vendor Request for Independent Evaluation.
"HGPII Principles" means the principles established by HGPII that underscore the healthcare group purchasing industry's commitment to use ethical business practices to help healthcare providers provide quality patient care at the most manageable cost.

"Member" means a healthcare provider that is a member of client of a GPO.

"Member Council" means a group or committee comprised of GPO Members that is responsible for clinical review, award determination and, where applicable, final review of the HGPII Evaluation.

"Neutral" means an independent third-party reviewer as determined by AAA.

"New Technology Process" means the process by which an individual GPO evaluates and awards contracts for New Technology.

"RFP" or "Request for Proposal" means an invitation to submit a proposal/bid issued by a GPO pursuant to a GPO Contract Process.

"Vendor" means a supplier that seeks a contract award from a GPO pursuant to a RFP or through a New Technology Process.

1. For more information about AAA, see www.adr.org.
John Hasnas, JD/LLM, Associate Professor of Business at the McDonough School of Business at Georgetown University

John Hasnas is a professor of business at Georgetown's McDonough School of Business, a professor of law (by courtesy) at Georgetown University Law Center and the executive director of the Georgetown Institute for the Study of Markets and Ethics. Professor Hasnas has held previous appointments as associate professor of law at George Mason University School of Law, visiting associate professor of law at Duke University School of Law and the Washington College of Law at American University, and Law and Humanities Fellow at Temple University School of Law. Professor Hasnas has also been a visiting scholar at the Kennedy Institute of Ethics in Washington, DC and the Social Philosophy and Policy Center in Bowling Green, Ohio. He received his B.A. in Philosophy from Lafayette College, his J.D. and Ph.D. in Legal Philosophy from Duke University, and his LL.M. in Legal Education from Temple Law School.
Bill O’Rourke retired from Alcoa in September, 2011. He continued to serve on the Board of the Alcoa Foundation and teach “Values” at Alcoa’s Corporate Executive Development Programs until 2013. He joined Alcoa as a Patent Attorney in 1975 and held a number of leadership positions including Corporate Patent Counsel, Vice President of Global Business Services (Financial Services, HR Services, Aircraft Operations, etc.), Chief Information Officer, Vice President of Procurement, Corporate Auditor, and Assistant General Counsel. From 2005 to 2008 Bill was the President of Alcoa-Russia. Bill was the Vice President, Environment, Health & Safety and Sustainability three times under three CEOs at Alcoa. Prior to Alcoa Bill was an Industrial Engineer for U.S. Steel Corporation and ran the underground mining parts business for Joy Manufacturing Company.

Bill is also a Fellow of the Wheatley Institution in the Marriott School of Business at Brigham Young University where he serves on the Ethics Advisory Board and teaches ethics to all Business School students. He is on the Board of Directors of John Carroll University in Cleveland and serves on the Ethics Advisory Counsel of the Healthcare Group Purchasing Initiative in Washington, DC. He was on the Board of Directors (Past Chairman) of Sustainable Pittsburgh, and serves on a number of other civic, charitable and religious organizations. From 2011 to August, 2014 Bill was the Executive Director of the Beard Institute for Ethics at the School of Business at Duquesne University. Bill lectures on Business Ethics and Safety at a number of companies around the world and at dozens of universities including the University of Pittsburgh, Michigan, Nebraska, Arizona State, Illinois, Carnegie Mellon, San Jose, Benedictine University, Notre Dame, Virginia Tech, the University of Dayton and Duquesne University. In
August, 2016 Bill published the book *A Field Guide to Business Ethics*, with co-authors Dr. Bradley Agle and Dr. Aaron Miller.

Bill received his undergraduate degree (BS/BA) from John Carroll University and his law degree (JD) from Duquesne University. Bill served as an officer in the U.S. Army Transportation Corps.

Bill and his wife, Elena, have three children and live in Pittsburgh, Pennsylvania.
Jacqueline E. Brevard is Senior Advisor at GEC Risk Advisory LLC, the global governance, risk, integrity, reputation and crisis advisory firm (www.GECRisk.com) serving executives, boards, investors and advisors in diverse sectors, growth stages and industries, primarily in the Americas, Europe and Africa. Client assignments range from strategic to tactical, including enterprise and specific risk assessments, crisis planning, integrity program development, codes of conduct, and customized education from the boardroom to the shop floor.

She is a Program Director for The Conference Board, a member of the Adjunct Faculty at New York University, and a member of the Faculty at the Ethics and Compliance Initiative, specializing in innovative risk management techniques. She is an Ethisphere 2009 100 Most Influential People in Business Ethics.

Ms. Brevard, the former Vice President, Chief Ethics and Compliance Officer of Merck & Co., Inc., is the pioneer and visionary who developed and successfully implemented the first comprehensive Global Ethics and Compliance Program for a top-tier global pharmaceutical company, driving Merck & Co. to a leadership position in organizational ethics and compliance and setting the standard that others would follow years later. She has more than 20 years of experience in the
corporate ethics and compliance field, as Merck’s Ethics and Compliance Program and Ombudsman Program were consolidated under Ms. Brevard who reported regularly to Merck’s Executive Committee and the Board. Ms. Brevard also has more than 15 years of experience as an international transactional attorney having completed projects, during her tenure at Merck, in Latin America, Asia-Pacific, Central and Eastern Europe, the Middle East and Africa.

She is Chair of the Board of the International Business Ethics Institute, a member of the Advisory Board of the Institute for Ethical Leadership at Rutgers University, and a member of the Advisory Board of the Healthcare Group Purchasing Industry Initiative (HGPII).

Ms. Brevard has also served on the Board of Directors of the Ethics and Compliance Initiative, and is Vice Chair Emeritus of the organization. She is a Founding Fellow of the Ethics Research Center's Fellows Program, where she served as its Chair. Ms. Brevard is a published author and a frequent speaker at many distinguished conferences and universities, including ECI conferences, Compliance Week, Practicing Law Institute, the Pharmaceutical Regulatory and Compliance Congress, the Corporate Executive Board's CELC, Institute for Ethical Leadership at Rutgers University, NYU, Georgetown University and Columbia University.

Ms. Brevard received a J.D. from Rutgers University School of Law and an LLM in International Law from New York University School of Law.
